Hiring Manager

Deloitte US-India, Product Engineering

Hyderabad, India

Subject: Application for Analyst – Product Engineering Position

Dear Hiring Manager,

I am writing to express my keen interest in the Analyst – Product Engineering role at Deloitte. As a final-year B.Tech student in Information Technology with hands-on experience in full-stack development, cloud fundamentals, and software engineering practices, I am eager to contribute my skills to Deloitte's mission of delivering scalable and high-quality enterprise solutions.

During my internships at Celebal Technologies and Adjecti Solutions, I built projects spanning React, Redux, Java (Spring Boot, Spring MVC, Servlets, Hibernate), and MySQL. These experiences honed my ability to design user-friendly frontends, build robust backends, and align applications with real-world business requirements. I also gained exposure to responsive design, test-driven development, and automation practices—all of which map directly to Deloitte's focus areas of Software Engineering, Quality Engineering, and DevOps.

My academic projects, such as SkyCast (a weather and travel planner with real-time APIs), Spotify Clone 2.0, and VelvetMuse (an e-commerce platform), reflect my ability to deliver end-to-end solutions by combining creativity with technical rigor. Additionally, my certification in Microsoft Azure AI Fundamentals demonstrates my commitment to cloud and AI technologies—skills increasingly valuable in Deloitte's product engineering journey.

I am particularly drawn to Deloitte's culture of continuous learning and innovation, and I am excited by the opportunity to grow alongside industry leaders while contributing to impactful projects. With my strong technical foundation, problem-solving mindset, and eagerness to learn, I am confident in my ability to thrive as an Analyst in Deloitte's Product Engineering team.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with Deloitte's vision and how I can contribute to your team's success.

Sincerely,

Diksha Dutta
